1. The following point numbers correspond to locations on the attached memory sketch Annex A of the village of Poraj. Poraj had about 3,000 inhabitants.

Point # 1. Factory Sinks (Fabryka Garnkow Sinks): Sinks was the name of a previous owner. This was an old factory which I remember as far back as 1937. It was one long building about 200 m. in length and about 100 m. wide, one-story high, built of stone and with a wooden roof. The area was partly surrounded by a brick wall and partly by a wire fence. Various enamelware, such as pots, pans, pails, etc. were produced there. I do not know how many people worked in this factory.

# 2. Ciuzynski's Baby Carriage Factory (Fabryka Wozkow Dziecinnych "Ciuzynski"): this factory was built in about 1938; I last saw it in the spring of 1952. It was a brick building about 100 m. long and about 30 to 40 m. wide. It was one or two stories high. The building was surrounded by a wooden fence. I do not know the number of people working there.

# 3. Blasting Furnaces for Iron Ore (Prazaki): the iron ore was brought from the iron mine Point No. 5 to the furnaces by a single-track narrow-gauge railroad. There were about six outdoor furnaces. Each was about 5 m. wide at the base and about 10 to 12 m. in height.

-2-

Complete smelting was not done there. I believe that the gangue was removed from the ore by baking, because chunks of gray-colored ore were removed from the furnaces. Originally the ore was a reddish color from the earth. I do not know if the ore from the iron mine located in the village of Ostrow just southwest of Poraj was brought to these furnaces.

- # 4. Factory for the Production of Glazed Insulating Pressboard (Fabryka Preszpanu "Klepaczka"): this pressboard was used as insulating material in electric motors and was produced from used paper. In 1948 I heard that this was one of two such factories in Poland. The other factory was supposed to be in Poznan or somewhere in the west of Poland. I do not know how old this factory is, but

same man owned the Natalin factory and this factory. This factory, an irregularly-shaped building, was about 150 m. long on the longest side and about 150 m. wide on the widest side. It was a brick building. About 200 people worked here in three shifts, and about 80% of them were women.

- # 5. Iron Mine (Kopalnia Rudy Zelaznej "Borek"): I saw this mine only from a train window, but it was known as a very rich source of iron ore.
- # 6. Transfer Point for Iron Ore: the ore brought from the furnaces /Point No. 3/ was transferred to railroad cars at this transfer point. I do not know where the ore was shipped.
- # 7. Transfer Point for Iron Ore: the ore was brought here from the iron mines in the village of Ostrow. I do not know where it was shipped to or if it was shipped to the furnaces /Point No. 3/.
- # 8. Railroad Station and Warehouse: for the storage and transfer of goods. This was the main railroad station for the surrounding villages.
- # 9. Abandoned Sawmill: I remember this installation as abandoned in 1950. It was of stone, one-story high, about 60 m. long and 30 m. wide.
- # 10. Railroad Warehouse: for perishable commodities.
- # 11. Offices for the Village Presidium of the People's Council and for the Citizens' Police (Milicja Obywatelska).
- # 12. Office: for the Village Committee of the United Polish Workers' Party (Polska Zjednoczona Partja Robotnicza -- PZPR) and location of the Cultural House (Dom Kultury), a library, recreation hall, etc. for the village youth.
- # 13. Fire Department.
- # 14. Postoffice Building.

2. The following are approximate distances from the railroad passenger station to the following numbered points on the memory sketch Annex A7:

To No. 1 - 0.2 km.

2 - 1.0 km.

## LEGEND

-  Factory for the production of pressboard / Annex A, Point No. 47, also Cardboard Box Factory Natalin in Maslonskie.
-  The churches located on the hill can be seen from a long distance.
-  Elevator towers to lower men into the iron mines.
-  Clay and earth mounds about 25 m. high resulting from iron ore mining operations.
-  Steel supports for high voltage cables. This line begins somewhere in Silesia, and in 1948 extended as far as Lodz / 5146N-1926E/. Under the Six-Year Plan it is to be extended to Warsaw.
-  Double-Track Railroad.
-  Single-Track Railroad.
-  Forests.

The following are approximate distances between villages shown on the Memory Sketch of Poraj and Vicinity / Annex. B/:

|                          |              |
|--------------------------|--------------|
| Poraj to Osiny           | 1.5 km.      |
| Poraj to Choron          | 1.5 to 2 km. |
| Poraj to Jastrzebie      | 1 to 1.5 km. |
| Poraj to Kuznica         | 3 km.        |
| Poraj to Gezyn           | 5 km.        |
| Poraj to Maslonskie      | 5 km.        |
| Maslonskie to Ostrow     | 1 km.        |
| Maslonskie to Przybynow  | 6 km.        |
| Maslonskie to Podkuznica | 0.5 km.      |
| Maslonskie to Kuznica    | 1.5 km.      |
| Kuznica to Gezyn         | 1 km.        |
| Przybynow to Choron      | 2 km.        |
